

Another fine program of:

Surviving the Next Pandemic

Bird Flu and Other Emerging Infectious Diseases

Presented by Michael Greger, M.D.
Director of Public Health and Animal Agriculture
The Humane Society of the United States

Date: **Friday, April 20**

Time: **7 p.m.**

Location: **Calvin College Theological Seminary Auditorium, 3233 Burton SE.**

Sponsored by: *Farms Without Harm & Calvin College Departments of Biology and Philosophy, Office of Community Engagement/Provost's Office and Contextual Disciplines Division*

Leading public health authorities now predict as inevitable a pandemic of influenza, triggered by bird flu and expected to lead to millions of deaths around the globe. The influenza virus has existed for millions of years as an innocuous intestinal virus of wild ducks. What turned a harmless waterborne duck virus into a killer? In a thrilling multimedia presentation, Dr. Michael Greger traces the human role in the evolution of this virus. In the face of the coming pandemic, Dr. Greger reveals what we can do to protect our families and what society can do to reduce the likelihood of such potential catastrophes in the future.
